Global wind learning versus candidate-path learning

Wind learning
MBD execution

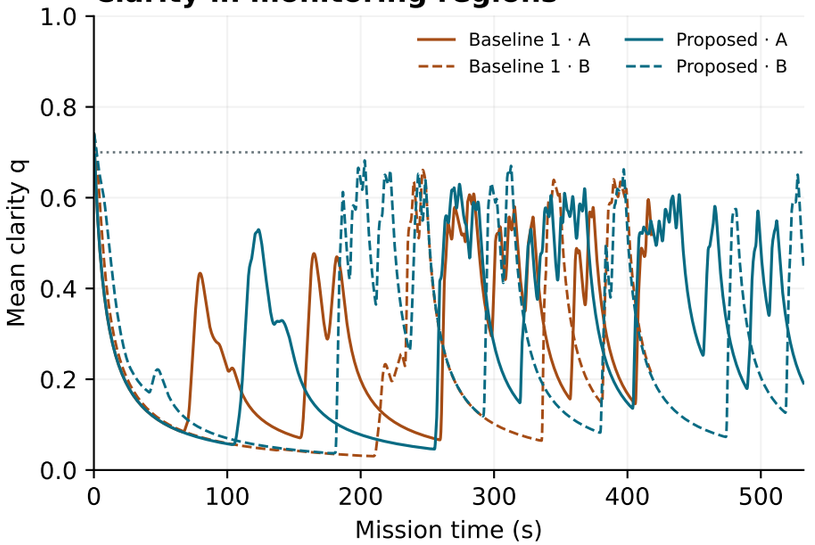

Scenario 1 · actual execution phases

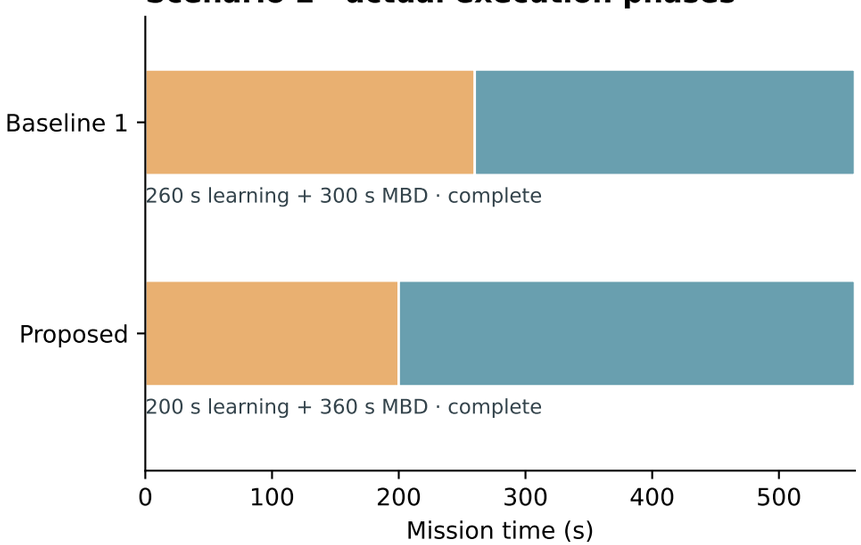

Accumulated monitoring cost

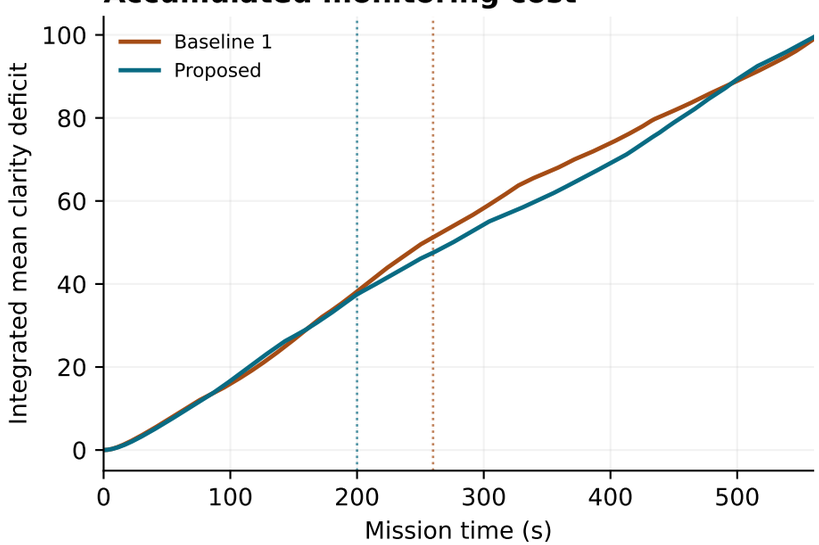

Clarity in monitoring regions

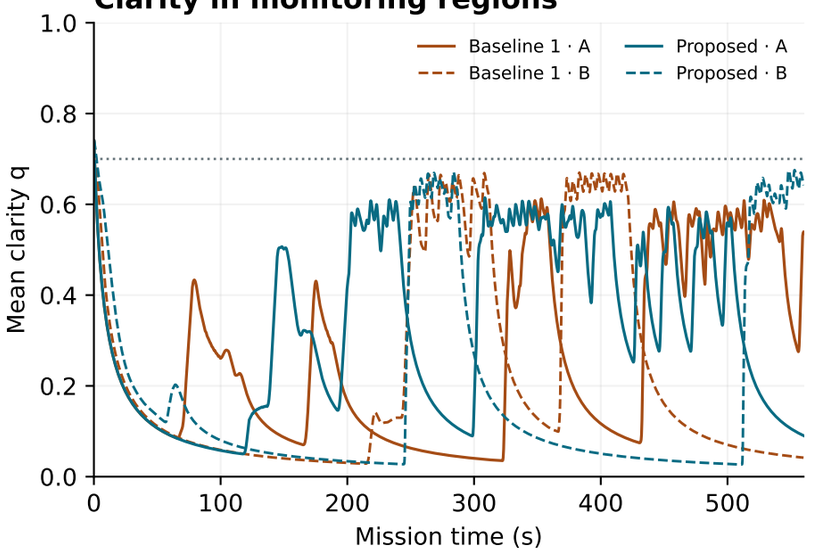

Scenario 2 · actual execution phases

Accumulated monitoring cost

Clarity in monitoring regions

All recorded center-in-B trials are shown. Red ×: contact; hatched phase: unexecuted time. Costs stop with the recording; an early failed run is not a lower-cost completed mission. Safety-aware control, no safety guarantee.
