
Ten monitoring tasks: physical air flow, obstacle geometry and monitored cells
Orange: monitored cells. Black star: initial quadrotor position. Synthetic fields; full nonlinear quadrotor execution.
Original A/B monitoring
2 obstacles · 2 target areas
Original A/B, reversed wind
2 obstacles · 2 target areas
Four-courtyard district
6 obstacles · 4 target areas
Industrial exhaust inspection
8 obstacles · 6 target areas
Serpentine street survey
6 obstacles · 5 target areas
Atrium ring and gated courtyards
7 obstacles · 5 target areas
Freight-terminal service network
8 obstacles · 6 target areas
Shielded-facade perimeter patrol
6 obstacles · 4 target areas
Four-branch inspection network
8 obstacles · 6 target areas
Distributed mixed-priority survey
8 obstacles · 6 target areas
